CAREER OBJECTIVE:

Seeking a motivating and challenging position as a snowflake developer in a growing environment. To work in highly competitive company which will help me to use my knowledge and skills to realize the goals of the company and to exceed in my work areas.

PROFILE SUMMARY

Around 3 Years of professional IT experience in this area of snowflake cloud data warehouse and snowflake developer.

- Having Professional working Experience in Snowflake with cloud storage i.e AWS S3.
- Hands-on experience in Snowflake components (snow-pipe, stored procedures, streams, tasks, views, etc) for data transformations
- Experience with aggregate & analytics functions, DDL, DML, Snow-SQL.
- Hands-on experience in bulk loading and unloading data into Snowflake tables using COPY command.
- Used COPY/INSERT, PUT, GET commands for loading data into Snowflake tables from internal/external stage.
- Handling large and complex datasets like JSON, CSV files from various sources like AWS S3.
- Experience in writing complex SQL scripts using Statistical Aggregate functions and Analytical functions.
- Good knowledge of architecting and implementing very large-scale data intelligence solutions around Snowflake Data Warehouse.
- A solid experience and understanding of architect snowflake, SQL
- Experience with Snowflake Data warehouse, deep understanding and processing Experience with performance tuning of Snowflake data warehouse with Query Profiler, Caching and Virtual data warehouse scaling.
- Good knowledge of Database management system implementation with SQL.
- Well-acquainted in working with complex SQL queries with Joins, Functions, Sub-queries, Views and Set operators.
- Created Clone concepts to maintain zero copies in Snowflake.
- Experience in working with AWS S3 and Snowflake cloud data warehouse.
- Advanced SQL skills including complex Joins, snowflake stored procedures, views etc.
- Good exposure in Snowflake Cloud Architecture and Snow-SQL and SNOWPIPE for continuous data loading.
- In-depth understanding of Data Warehouse, ETL concept.
- Experience gathering and analyzing system requirements.
- Understanding customer requirements, analysis, design, development and implementation into the system, gather and define business requirements and enhancing business processes.

TECHNICAL SKILLS

Cloud Data Warehouse	Snowflake Cloud Data Warehouse
BI Tool	MS Power BI (Exploring)
ETL Tools	Informatica Power Centre (Exploring)
Databases	Oracle 11g/10g/9i/8i
SQL Developer	SQL Developer
Programming Languages	Oracle PL/SQL (Stored Procedures, triggers, Indexes), Python
Operating Systems	Windows, Unix, Linux

PROFESSIONAL EXPERIENCE

Currently working as Software engineer in **Cognizant Technology Solution** from Jan 2021 to till now.

Project No. -#1

Role : Snowflake Developer

Client- Johnson & Johnson (J&J)

Tools & Environment – Snowflake Cloud Data Warehouse Developer, Linux, AWS S3, Data warehouse, Jira.

Project Description:

Johnson & Johnson (J&J) is an American multinational corporation founded in 1886 that develops medical devices, pharmaceuticals, and consumer packaged goods. Its common stock is a component of the Dow Jones Industrial Average and the company is ranked No. 36 on the 2021 Fortune 500 list of the largest United States (US) corporations by total revenue. Johnson & Johnson is one of the world's most valuable companies, and is one of only two U.S.-based companies that has a prime credit rating of AAA, advanced than that of the United States government. Johnson & Johnson is headquartered in New Brunswick, New Jersey, the consumer division being located in Skillman, New Jersey.

Roles and Responsibilities:

- Perform data integration with third-party tools including architecting, designing, coding, and testing phases.
- Developed snowsql queries for incremental loads by using merge statements.
- Extensive experience with Snowflake concepts such as SnowSQL, SnowPipe, Streams, Tasks, Streams, Time travel, Optimizer, data sharing, and stored procedures.
- Regular engagement with teams for status reporting and routine activities .
- Regular engagement with teams for status reporting and routine activities
- Experience in Data warehousing star and snowflake schema, Dimensions, Facts, and Data modelling.
- Experience gathering and analyzing for project requirements .
- Developed views, materialized and secure views for reporting purpose.
- Writing complex Snowflake SQL scripts in Snowflake cloud data warehouse to Business Analysis and reporting.
- Good exposure on loading and unloading from the various sources.
- Good exposure on bulk loading and snowpipe configurations.
- Good exposure on creating various tables and stages.

Project No. -#2**Role : Snowflake Developer****Client- Novartis International AG**

Tools & Environment – Snowflake Cloud Data Warehouse Developer , Oracle 11g, Azure Data Factory, Linux, Datawarehouse, Jira.

Project Description-2:

Novartis International AG is a Swiss multinational pharmaceutical company based in Basel, Switzerland. It is one of the largest pharmaceutical companies in the world. Novartis manufactures the drugs. Novartis is a full member of the European Federation of Pharmaceutical Industries and Associations (EFPIA), the International Federation of Pharmaceutical Manufacturers and Associations (IFPMA), and the Pharmaceutical Research and Manufacturers of America (PhRMA).

Roles and Responsibilities:

- Designed and customized data models for Data warehouse supporting data from multiple sources on real time. Involved in building the ETL architecture and Source to Target mapping to load data into Data warehouse.
- Responsible for all activities related to the development, implementation, administration and support of ETL processes for large scale data warehouses using Snowflake cloud Data warehouse.
- Create task flows to automate the data loading/unloading to/from Snowflake data warehouse and AWS S3 .
- Writing complex SQL scripts in Snowflake data warehouse to support Business reporting.
- Creating automated scripts to load data from Snowflake to though spot server.
- Perform troubleshooting analysis and resolution of critical issues.
- Involved in Performance tuning of sessions, PL/SQL procedures.
- Involved in data analysis and handling ad-hoc requests by interacting with business analysts, clients and resolve the issues as part of production support.
- Preparing weekly, monthly and quarterly status reports to update customer about team's accomplishments.
- Conducting training and Knowledge sharing sessions for Testing team and Production support teams.
- Worked on various roles like account admin, security admin, user admin, sysadmin and public assigning to the users.
- Worked on custom roles that have been created by security admin role.

ACADAMIC DETAILS:

Bachelor's degree in Mechanical Engineering from Appa Institute Of Engineering & Technology Kalaburagi in 2021.

DECLARATION:

The above-furnished details are true to the best of my knowledge. And Give an Opportunity position as a snowflake developer, I will be proved myself.

Thank You

(Prasanna Kulkarni)
